

## **Senior Strategic Analyst, Strategic Assessment Team Louisville, Colorado**

### **Opportunity**

Join a multimedia tech leader and help us develop new technologies for an internet-connected world. As a Senior Strategic Analyst you will have the unique opportunity to learn and influence how the cable industry operates across a wide range of business and consumer services. In this role you will apply your thorough understanding of analytical techniques to the cable business, and give you the opportunity to present to cable executives from around the world.

### **Responsibilities**

You will be responsible for performing strategic analysis of consumer and business products and services in the cable and telecommunications industries, with a focus on competitive assessments, cost assessments, market assessments, and technology trend assessments. Analysis work includes business case development - estimating financial returns through discounted cash flow analysis of potential or existing businesses and competitive position analysis – and possible competitive reactions. You will also work with and sometimes lead virtual teams composed of CableLabs and Cable industry subject matter experts to collect and synthesize information in support of your analysis work, which you'll present findings to audiences of cable executives and engineers.

Specific areas of expertise should include Access Network Technologies and Business Services. Product experience with service providers or equipment vendors in the areas of hosted application services, data centers, colocation services, VPNs, metro Ethernet services, fiber optic access networks, twisted pair access networks, and/or wireless networks is a plus.

### **Qualifications**

- BS degree in Engineering, Computer Science, Applied Mathematics, Operations Research, Physics, Economics, or Business Administration.
- Minimum 3+ years' experience in engineering, software, strategy, corporate development, product management, competitive analysis, or a related field required.
- 2+ years' experience in telecom and/or cable services required.
- Strong analytical skills and excellent written and verbal communication skills.
- Ability to write clear and concise reports; ability to support assertions with data and with logical and defensible explanations.
- A passion for answering "why" questions is an absolute requirement.
- Experience in analysis of large data sets is a plus.
- Experience that includes the design, deployment, management of, or operation of telecommunications services is a plus.
- Experience in the development of detailed models in Microsoft Excel is a plus.
- Willing to travel 25%.
